

How To Measure your Windows for Blinds:

Please remember to measure the window (Width x Height) as seen below

Measure inside of the window trim, always measure width first then height and write it down in that order, also please use inches. If the window is longer then 108" the blind will need to be split in two at the mullion, (see illustration)

Windows larger then 108" inside width only

Please fill out the below chart and we will get you a quote promptly: if more room on this chart is needed please print this page twice keep filling in the chart. Label Page 1 of 2. Scan or photograph and return.

List of blinds for quote:
(Please feel free to write in more Lines as needed)

Name /Location	Width	Height	Type of blind	Color
----------------	-------	--------	---------------	-------

Example:

Living Rm

55"

60"

Dual shade

Dove Grey

(Please add pages if you need them for as many blinds as nessasary)
